Your space miracle 2022

Welcome to your new travel companion, our space miracle 2022

This versatile floorplan offers enough space to travel with the whole family without having to sacrifice privacy. But it can also be enjoyed comfortably as a couple.

With the 6280, we return to the floor plan we have used for years to the satisfaction of our customers. With an overall length of about 30 feet, it's not the handiest floorplan in our fleet, but it's still maneuverable compared to the popular 30+ foot motorhomes on the market.

Many now think of the high fuel consumption given the dimensions. However, if you consider that even a smaller motorhome must have the same equipment as the larger models (all tanks, same kitchen, not to mention the same chassis), you will quickly realize that the extra length hardly adds any weight or fuel consumption.

Due to its well thought-out room-concept, the 6280 does not need a slide-out and still offers enough space for up to 7 people. Ideal for families but also for couples who want a little more comfort and space.

As in the past, we do not use slide-outs in this model, simply because the layouts with slide are often difficult to use when retracted, the slide causes additional wind noise when driving and the heavy mechanics are additionally detrimental to fuel consumption. In return, you get large panoramic windows and additional storage space, e.g. for the extensive kitchen equipment.

The reliable Ford V8 engines with 7.3L displacement and 325 hp are up to any challenge, so we can easily allow with our vehicles what others do not allow: Driving to Death Valley even in summer.

Your space miracle 2022

The living area:

The sleeping area can be well separated with a door and offers a lot easily accessible storage space and a comfortable queen bed, which is completely reversible. Since we always want to offer our renters something more, we have in all our motorhomes a higher quality mattress retrofitted, so you can sleep comfortably even and especially on vacation!

Also the corner kitchen with the high-quality stainless steel sink and the large work surface offers enough space to comfortably prepare a delicious dinner. The kitchen has a large refrigerator with a separate freezer compartment, includes a three-burner gas stove, a backing oven and a separate microwave.

The large dinette can easily be converted into a comfortable bed. Even if you are traveling with five people, however, this doesn't have to be the case. Because opposite of the dinette you will still find a 3-person jack knife sofa that can be folded out into a spacious bed. There are also two full-sized sleeping spaces in the overhead bunk.

The bathroom:

The bathroom is divided into two parts, but can be connected by opening and locking the doors to form an "en-suite" bathroom: this offers a shower cubicle with fixed door and a spacious bathroom in which even 5 people can comfortably store their utensils!
